Directory of

PRIMARY Wood-using Industries in Saskatchewan

The Canadian Forest Service's Northern Forestry Centre is responsible for fulfilling the federal role in forestry research and technology transfer in Alberta, Saskatchewan, Manitoba, and the Northwest Territories. The main objectives are research in support of improved forest management for the economic, social, and environmental benefit of all Canadians.

The Northern Forestry Centre is one of five centers of the Canadian Forest Service which has its headquarters in Ottawa, Ontario.

Le Service canadien des forêts, Centre de foresterie du Nord, représente le gouvernement fédéral en Alberta, en Saskatchewan, au Manitoba et dans les Territoires du Nord–Ouest en ce qui a trait aux recherches forestières, et au transfert de technologie. Cet organisme s'intéresse surtout à la recherche en vue d'améliorer l'aménagement forestier afin que tous les Canadiens puissent en profiter aux points de vue économique, social et environnemental.

Le Centre de foresterie du Nord constitue l'un des cinq établissements du Service canadien des forêts, dont l'administration centrale est à Ottawa (Ontario).

ABSTRACT

Primary wood-using industries in Saskatchewan were surveyed by telephone in the early part of 1999. This directory gives a summary for each operation. Information is provided on mill production, products, wood supply, species utilized, employment generated, and markets. Sawmills, wood treating plants, log home builders, commercial fuelwood producers and the pulp, paper, oriented strandboard, and plywood mills are grouped by industry type, size of operation, and ecoregion.

RÉSUMÉ

Au début de 1999, l'industrie de la transformation primaire du bois en Saskatchewan a fait l'objet d'une étude. Le présent répertoire fournit un résumé décrivant chaque entreprise. On y trouvera des renseignements sur la production et les produits, l'approvisionnement en bois, les essences utilisées, les emplois créés et les marchés. Les scieries, les usines de traitement du bois, les constructeurs de maison en bois rond, les producteurs de bois de chauffage commercial et les usines de fabrication de pâte, de papier, de panneaux OSB et de contreplaqué sont groupés par type d'industrie, taille de l'entreprise et écorégion concernée.

CONTENTS

Introduction 1

Abbreviations and Terms Used in this Directory 3

Pulp and Paper, Oriented Strandboard, and Plywood Mills 7

Sawmill–Planing Complexes Producing More Than 5 MM fbm 13

Sawmill–Planing Complexes Producing 1 MM to 4.999 MM fbm 27

Sawmill–Planing Complexes Producing 100 M to 999 M fbm 39

Sawmill–Planing Complexes Producing Less Than 100 M fbm 115
East Boreal Ecoregion 117
Shield Ecoregon 129
West Boreal Ecoregion 133

Log Home Builders 139

Wood Treating Plants 151

Miscellaneous Wood-using Industries 159

Proposed Forest Industry Developments 167

DISCLAIMER

The views, conclusions, and recommendations are those of the authors. The exclusion of certain manufactured products does not necessarily imply disapproval, nor does the mention of other products necessarily imply endorsement by the Canadian Forest Service.

INTRODUCTION

This directory lists and describes the firms comprising the primary wood-using industries in Saskatchewan in 1999. It updates improvements and changes in the industry since the previous directory was compiled in 1992. The directory includes all provincial forest industries and mills principally engaged in manufacturing lumber, pulp and paper, plywood, oriented strandboard, posts and poles, treated wood products, commercial fuelwood, and log homes. There is also a section on proposed forest industry developments.

The information was collected in 1999 through telephone interviews with the managers or owners of the various operations. It relates to a 1-year operating period, either fiscal or calendar, ending in 1998-1999.

Each operation is briefly described in terms of its location, management, production, employment, wood supply, species, and markets.

The directory is divided into nine major sections:

1. Pulp and paper, oriented strandboard, and plywood mills
2. Sawmill–planing complexes producing more than 5 MM fbm
3. Sawmill–planing complexes producing 1 MM to 4.999 MM fbm
4. Sawmill–planing complexes producing 100 M to 999 M fbm
5. Sawmill–planing complexes producing less than 100 M fbm
6. Log home builders
7. Wood treating plants
8. Miscellaneous wood-using industries
9. Proposed forest industry developments

Product volumes, sizes, and descriptions are reported in units commonly used by each industry sector. Production is reported for lumber in foot board measure (fbm), roundwood in cubic metres (m^3), pulp and paper in (metric) tonnes, and oriented strandboard and plywood in square feet (ft^2). A map (Fig. 1) of Saskatchewan showing forestry administrative ecoregions for the Department of Saskatchewan Environment and Resource Management is included on page 4. A summary of the number of firms, total annual production, and employment estimates by industry category and size is presented in Table 1 on page 5.

Appendix I lists associations relevant to Saskatchewan's primary wood-using industries. Appendix II lists metric conversion factors used in this directory. Appendix III documents personnel of the Forest Ecosystems Branch, Saskatchewan Environment and Resource Management. Appendix IV lists information on Saskatchewan's timber allocation system.

This directory provides information on the primary manufacturing capabilities of the Saskatchewan forest industry. The information will be of interest to people who are involved in manufacturing secondary wood products, buying or selling wood products, developing forest policy, and servicing forestry operations as well as government agencies and others who have an interest in Saskatchewan's forest industry.

The Canadian Forest Service has also published the *Directory of secondary wood-using industries in Saskatchewan, 1999*. Both directories are available free of charge from:

ABBREVIATIONS AND TERMS USED IN THIS DIRECTORY

Units of Measure:

fbm	foot board measure
M	thousand
MM	million
in (")	inch
ft (')	foot
ft^2	square foot
ft^3	cubic foot
lb	pound
mm	millimetre
cm	centimetre
m	metre
km	kilometre
m^2	square metre
m^3	cubic metre
kg	kilogram
ha	hectare
t	tonne

Acronyms:

ADMT	air-dried metric tonnes
CFPA	Central Forest Products Association
CTMP	chemi-thermomechanical pulp
FMLA	Forest Management License Agreement
MDF	medium density fiberboard
OSB	oriented strandboard
N/A	not available

Tree Species:

Coniferous Trees:

bF	balsam fir
jP	jack pine
lP	lodgepole pine
bS	black spruce
wS	white spruce
tL	tamarack/larch
cedar	western red cedar

Deciduous Trees:

tA	trembling aspen
wB	white birch
bPo	balsam poplar

Markets:

AB	Alberta
BC	British Columbia
MB	Manitoba
ON	Ontario
QC	Quebec
SK	Saskatchewan
US	United States

Definitions:

Custom sawing and/or planing:
The mills that provide this service cut and/or plane other industries' or individual's logs and lumber for a service charge.

Local: Market area within a 100 kilometre radius of a mill operation.

Person-year: Equivalent to 240 days at 8 hours per day.

Roundwood: Includes sawlogs, pulpwood, building logs, and fuelwood.

Wood chips: Where chip production was reported in bone dry units (1090 kg or 2400 lb of bone dry wood chips) or metric tonnes, conversion to cubic metres (m^3) was based on species composition and density.

APPENDIX II

Metric Conversion Factors for Timber Products

Selected Conversion Factors for Timber Products

Conversion factors listed below have been used in this directory to determine roundwood volumes.

Timber Product	Equivalent Value	
Fence posts (per piece)		
6' × 3½" top diameter	0.4 ft^3	0.011 m^3
6' × 4½" top diameter	0.7 ft^3	0.019 m^3
6' × 5½" top diameter	1.0 ft^3	0.028 m^3
7' × 3½" top diameter	0.5 ft^3	0.013 m^3
7' × 4½" top diameter	0.8 ft^3	0.023 m^3
7' × 5½" top diameter	1.2 ft^3	0.033 m^3
8' × 5½" top diameter	1.3 ft^3	0.037 m^3
8' × 6½" top diameter	1.8 ft^3	0.052 m^3
8' × 7½" top diameter	2.4 ft^3	0.070 m^3
8' × 8½" top diameter	3.1 ft^3	0.088 m^3
Rails	1.0 ft^3	0.0283 m^3
Utility poles (20–50 ft)	21.26 ft^3	0.6021 m^3
1000 fbm lumber (1 M fbm)	4.255 m^3 (solid wood content)	
Lath		
1 bundle (50 pieces)	9 fbm	
Railway ties		
Grade #1 (7"× 9"× 8')	42 fbm	0.179 m^3
Grades #2, #3 (6"× 8"× 8')	32 fbm	0.135 m^3
Wood chips and hog fuel		
Oven dry tonne (ODT) wood chips	2204 lbs	0.918 BDU (1000 kg)
Bone dry unit (BDU) wood chips	2400 lbs	1090 kg
Unit (hog fuel)	200 ft^3 (packed)	5.66 m^3 (packed)
	72 ft^3 (solid wood)	2.038 m^3 (solid wood)
Wood chip weight to volume conversion[a]	1 oven dry tonne = 2.5963 m^3	
Shakes and shingles (square = 100 ft^2)	Shakes - 5 bundles per square (10" exposure) Shingles - 4 bundles per square (5½" exposure)	
Panel products[b]	1000 ft^2 of sheet product (⅜" basis) = 0.884 m^3	

[a] Commonly used conversion in Saskatchewan for softwood wood chips.

[b] Industry standards show plywood products in thousands of square feet based on ⅜" thick panels. (One 4' × 8' sheet of panel ⅜" thick contains 1 ft^3 of material.) Production equivalents in metric units are usually given in cubic metres (m^3) regardless of sheet thickness.

Saskatchewan Forestry Factors for Metric Conversion

These conversion factors are used by the Saskatchewan Forestry Branch for official standard timber conversion factors.

Equivalency	Equivalency
1 inch = 2.54 centimetres	1 centimetre = 0.394 inches
1 foot = 0.3048 metres	1 metre = 3.281 feet
1 yard = 0.9144 metres	1 metre = 1.0936 yards
1 chain (66 ft) = 20.1168 metres	1 metre = 0.0497 chains (66 feet)
1 mile = 1.609 kilometres	1 kilometre = 0.621 miles
1 square foot = 0.092903 square metres	1 square metre = 10.764 square feet
1 acre = 0.4047 hectares	1 hectare = 2.471 acres
1 square mile = 2.590 square kilometres	1 square kilometre = 0.386 square miles
1 cubic foot = 0.0283 cubic metres	1 cubic metre = 35.3147 cubic feet
1 gallon = 4.546 litres	1 litre = 0.220 gallons
1 cubic foot/acre = 0.070 cubic metre/hectare	1 cubic metre/hectare = 14.913 cubic feet/acre
1 pound = 0.4536 kilograms	1 kilogram = 2.2046 pounds
1 ton = 0.907 tonnes	1 tonne = 1.102 tons
1 cord (solid wood) = 2.407 cubic metres	1 cubic metre (solid) = 0.415 cords
1 cord (stacked wood) = 3.625 cubic metres	1 cubic metre (stacked) = 0.276 cords
1 cord (stacked/acre) = 8.956 cubic metres (stacked/ha)	1 cubic metre (stacked/ha) = 0.112 cords (stacked/acre)
1 cunit (100 cubic feet) = 2.832 cubic metres	1 cubic metre = 0.353 cunits

APPENDIX IV

Saskatchewan's Timber Allocation System

Saskatchewan's Timber Allocation System[a]

(implemented April 1, 1999 as per provisions in the *Forest Resources Management Act*)

Forest Management Agreement (FMA)
(formerly Forest Management License Agreement)

This license provides a timber disposition term for up to 20 years. The FMA holder must obtain approval from the Minister of Environment and Resource Management (SERM) for a 20-year forest management plan. Five-year operating plans must be submitted for approval annually before the licensee may commence activities authorized in the FMA. In every fifth year of the agreement there is provision to extend the license for another 5-year period. Therefore, the term of the agreement after each extension is 20 years. Twenty-year FMAs are considered a development and subject to provisions of the *Environmental Assessment Act*. FMAs of a lesser term may or may not be considered developments.

Term Supply License (TSL)
(formerly Term Cutting Agreement)

This license provides a timber disposition for up to 10 years. A licensee must obtain the approval of the Minister of SERM for a 10-year forest management plan and submit subsequent annual operating plans before implementing activities authorized in the TSL. Renewal of a TSL is dependent on the licensee's performance and the availability of sufficient wood supply. TSLs may be subject to provisions of the *Environmental Assessment Act* if they are deemed to be a development.

Forest Product Permit (FPP)
(formerly Timber Permit and Forest Product Field Permit)

This is an annual permit that confers the right to harvest specified forest products. Each FPP expires on either the date specified on the permit or the following March 31, whichever comes first.

[a] In this directory, information about the companies' "Wood/Fiber Supply" uses terms from Saskatchewan's former timber allocation system.

ACKNOWLEDGMENTS

Sincere appreciation goes to all persons who contributed information to make this directory possible, especially the owners and managers of the primary forest products industry in Saskatchewan. Their contribution is gratefully acknowledged.

The authors wish to thank Darcy Stead for his help in interviewing the forest operators and Sandra Williams for data entry and editing assistance. Appreciation is also extended to Kelly Petkau (Canadian Forest Service) for his computer programming assistance.

Funding assistance was provided by the Saskatchewan government; this contribution is gratefully acknowledged.
